PROFESSIONAL PROFILE

Data Analyst and Full-Stack Developer with hands-on experience building production data platforms, ETL pipelines, and internal process automation systems. Currently responsible for a real estate intelligence platform in Brazil. Computer Engineering student specialising in Networks and Cybersecurity, with research focused on AI-driven data security. Driven by a continuous learning mindset and practical problem-solving at the intersection of data engineering, analytics, and software development.

WORK EXPERIENCE

Data Analyst · 61 Imóveis · Brasília, Brazil

Jan 2026 – Present

- Own the end-to-end data pipeline: collection via web scraping, ETL processing, storage in PostgreSQL, and delivery through Power BI dashboards
- Lead development and maintenance of **Inteligência 61 Imóveis** (inteligencia61imoveis.com.br), a production real estate pricing platform with 10,000+ properties monitored
- Design and implement internal process automations using Python scripts and Google Apps Script, cutting manual operational effort
- Manage cloud infrastructure on AWS (RDS and EC2) and maintain PostgreSQL databases
- Build full-stack features across React front-end, Flask REST API, and PostgreSQL back-end
- Deliver business intelligence reports and KPI dashboards for market analysis and customer behaviour insights

Python React JavaScript Flask PostgreSQL Power BI AWS RDS/EC2 ETL Web Scraping Git

Data Engineering Intern · 61 Imóveis · Brasília, Brazil

Mar 2024 – July 2025

- Developed web scraping pipelines and ETL workflows to integrate data from external sources
- Built and maintained Power BI reports for tracking business indicators
- Assisted in monitoring and maintaining database infrastructure and cloud servers
- Automated repetitive tasks using Python and Google Apps Script

Python PostgreSQL Power BI AWS Git

IT Support Intern · Ministério Público Militar (Military Public Ministry) · Brasília, Brazil July 2025 – Jan 2026

- Handled and resolved end-user support tickets for a government institution
- Installed, configured, and maintained hardware peripherals and software applications
- Tracked and inventoried new IT equipment across the department
- Documented processes and contributed to the institutional knowledge base

EDUCATION

B.Sc. in Computer Engineering · IESB — Instituto de Educação Superior de Brasília · Brasília, Brazil 2023 – Present (Expected 2026)

- Current semester: 7th — specialisation track in Networks & Cybersecurity
- Undergraduate thesis (TCC): *AI-based Honeypot System for Cybersecurity Threat Detection and Data Security*

SELECTED PROJECTS

Real Estate Pricing Intelligence Platform · inteligencia61imoveis.com.br · Production 2024 – Present

- End-to-end platform for property valuation using live market data from 10,000+ listings
- Full architecture owned: scraping pipeline → ETL → PostgreSQL on AWS → Flask API → React UI

TECHNICAL SKILLS

Languages	Python, JavaScript, SQL, HTML, CSS
Data & Analytics	PostgreSQL, Power BI, ETL Pipelines, Web Scraping, Pandas, Data Cleaning & Transformation
Web Development	React, Flask, REST APIs, Responsive Design
Cloud & DevOps	AWS (RDS, EC2), Git, Linux
Automation	Python scripting, Google Apps Script
Cybersecurity	Network Traffic Analysis, Honeypot Systems, Sensitive Data Protection

LANGUAGES

Portuguese	Native
English	Professional working proficiency (technical reading, writing, and communication)
